

Iheb Elleuch

B.Eng. Automation Systems and Production Informatics

Automation Engineering graduate with experience in the analysis and optimization of industrial systems. Focus on the development of software solutions for automation, visualization, and data-driven process optimization.

Practical experience at Bosch and Schuler Pressen as well as solid project work in an academic environment, including the development of LLM-based applications and real-time monitoring systems.

EDUCATION

Bachelor of Engineering 09/2022 - 02/2026
Esslingen University of Applied Sciences (Göppingen, Germany)

Automation Engineering and Production Informatics

- **Final Grade:** 1.9
- **Semester Abroad:** ESTACA, Paris, France (01/2025 - 05/2025)
- **Extracurriculars:** Co-founder of the underwater robotics initiative U.Stall

High School Diploma 09/2018 - 07/2022
Lycée Technique 9 Avril 1938 (Sfax, Tunisia)

- **Focus:** Mathematics | **Grade:** 2.0 (Equivalent)

WORK EXPERIENCE

Bachelor Thesis in Laser Technology 09/2025 - 02/2026
Bosch Manufacturing Solutions GmbH

- Development of an LLM-based chatbot for script generation of scanner-controlled laser processes.
- Fine-tuning and deployment of a locally executable LLM.
- Design of a scalable data generation pipeline.

Research and Software Engineering Intern 09/2024 - 01/2025
Bosch Manufacturing Solutions GmbH

- Led the development of a graphical user interface (C# / WPF) for dynamic laser beam shaping.
- Designed a backend communication architecture using gRPC and Python.
- Software validation on the physical prototype.

Working Student - Real-Time Systems 12/2022 - 08/2024
Schuler Pressen GmbH (Andritz)

- Developed real-time monitoring systems and visualized dashboards in Grafana.
- Data processing (Prometheus, PostgreSQL) and routing via Node-RED.
- Developed automation tools in Python and VSB.

Mathematics Tutor 08/2022 - 08/2023
Lernstudio Barbarossa

- Taught complex mathematical concepts.
- Created individualized learning plans for targeted exam preparation.

SKILLS

- **Programming:** C++, C#, Python, JavaScript, SQL, VBA
- **Technologies:** WPF, .NET, gRPC, Node-RED, Grafana, Prometheus, PostgreSQL, LLM Fine-tuning
- **Tools:** Git (GitHub, GitLab, Azure DevOps), Visual Studio, VS Code, Unity Engine, MS Office, LLM Tools (Axolotl, Llama-Factory, Augmentoolkit)
- **Nationality:** German, Tunisian
- **Other:** Driver's License (Class B)

LANGUAGES

- **German:** Native
- **Arabic:** Native
- **English:** C1
- **French:** B2

PROJECTS

- **MATE ROV Competition (U.Stall):**
Lead of Software Architecture (Since 10/2023). Development of system components for robot control and visualization. Participation in international competitions (USA 2024: 4th Place (Pioneer), USA 2025: 11th Place (Explorer), Canada 2026: Incoming (Explorer)).
- **Academic Robotics Projects:**
Team development of a voice-controlled robot (Python, web interface) and a modular robot with a standardized physical interface.
